

GOODWIN

Climate Tech

Goodwin's Climate Technology practice focuses on entrepreneurs, operating companies, and investors who are pioneers in the climate technology market. We currently counsel more than 2,500 technology-enabled clients and we represent more than 500 venture capital and private equity firms, leveraging relationships with investors on behalf of our clients.

Serving Your Industry

- Provide top-tier legal services to, climate technology enterprises worldwide, as well as the investors that finance them
- Represent global enterprises as well as venture-backed start-up companies
- Serve as advisors to address the principal challenges faced by management, investors and boards of directors
- Act as a strategic business partner from incorporation or seed investment through exit
- Exceptional understanding of issues facing clients in the sustainability innovation sector
- Partner with startups and offer courtesy discounting and fee deferrals for qualified companies

Practicing Across Sectors

We are active in the climate technologies, as well as alternative and renewable energy sectors, including:

- Advanced materials and composites
- Additive and distributive manufacturing
- Battery technologies
- Closed loop
- Carbon capture and sequestration
- Distributed energy resources
- EV infrastructure and sustainable transportation
- Energy transmission and grid functionality
- Geothermal
- Grid-scale ocean technology
- Plastic alternatives and recycling
- Sustainable agriculture and forestry, construction, foods, and consumer packaged goods
